The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claims 1-7, 21, and 26-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taguchi et al. in view of Kellie et al. Taguchi et al. teaches a thermal fixing device comprising a fixing member 1, a first pressing member 13, and second pressing member 14 (figures 2-3; column 5, lines 33-57). The fixing member and the first pressing member apply the temperature to the interface at a position most downstream in the conveyance direction in a contact portion between the fixing member and the first pressing member. The first and second pressing members are surrounded by a belt (figure 1).

Taguchi et al. does not discuss the temperature of the fixing nip wherein the temperature of the first pressing member and the fixing member where they face is not lower than a glass transition point of a developer.

Kellie et al. teaches that the fixing nip should be above the glass transition point or softening of the developer (column 10, lines 9-12). It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the teaching of Kellie et al. with the image forming device of Taguchi et al. to set the appropriate temperature for the fixing device.

Application/Control Number: 10/799,585 Page 3

Art Unit: 2852

# Response to Arguments

Applicant's arguments filed 10-19-2006 have been fully considered but they are not persuasive. Applicant argues that only one of the pressure nips in Kellie et al. is above glass transition temperature. However, Kellie et al. clearly teaches that both are above this temperature at column 10, lines 9-12. The claims remain rejected as discussed above.

#### Prior Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakane (JP2001-201964a) teaches a fixing device wherein the fixing temperature at the two pressure nips are above glass transition temperature.

## Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Art Unit: 2852

# **Contact Information**

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quana M. Grainger whose telephone number is 571-272-2135. The examiner can normally be reached on 8am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Gray can be reached on 571-272-2119. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
